

KApro proudly introduce their KORG KRONOS EXs124 Library

KApro EXs124 „Famous String Ensemble“

Die KApro EXs124 „Famous String Ensemble“ Library bietet Ihnen ein Sound-Set aus

- 48 Programs und
- 45 (davon 21 stereophone) Multisamples

für den KORG KRONOS.

In den 1970er Jahren waren polyphone Synthesizer noch teure Mangelware. So kam es, dass „String Machines“ den Disco-Sound dieser Zeit prägten. Diese „String Machines“ fußen auf der Technik der gerade in den 1970er Jahren sehr beliebten elektronischen Orgeln, die im Gegensatz zu polyphonen Synthesizern die Klangerzeugung durch Frequenzteilung realisieren. Die „String Machines“ brachten teils monophon und teils vollpolyphon spielbare orchestrale Klänge, vor allem streicher- und bläserartige Klänge gehörten zum Repertoire dieser Instrumente. Der volle und unverwechselbare Klang wird durch die Kombination mehrerer analoger Verzögerungselemente erzielt, die durch mehrere Niederfrequenzoszillatoren moduliert werden. Wenngleich diesem Klang der Realismus fehlte, so wurde er gleichermaßen beliebt wie legendär und ist aus der Geschichte der Popmusik nicht mehr wegzudenken. KApro bringt den Klang einer der berühmtesten „String Machines“ nun mit der KApro EXs124 „Famous String Ensemble“ Library auf den KORG KRONOS.

„Möge die KApro EXs124 ‚Famous String Ensemble‘ Library mit Euch sein!“

Ein absolutes MUST HAVE für jeden KRONOS User!

KApro proudly introduce their KORG KRONOS EXs124 Library

KApro EXs124 „Famous String Ensemble“

The KApro EXs124 „Famous String Ensemble“ Library offers a sound set of

- 48 programs and
 - 45 (thereof 21 stereophonic) multisamples
- for the KORG KRONOS.

In the 1970s, polyphonic synthesizers were still expensive in short supply. So it was that "string machines" impressed the disco sound of this time. These "string machines" are based on the technology used in electronic organs which were extremely popular in the 1970s. In contrast to polyphonic synthesizers, the sound generation of "string machines" is based on frequency division. "String machines" offered partly monophonic and partly fully polyphonic orchestral sounds, especially string and brass like sounds were part of their repertoire. Their full and distinctive sound is achieved by combining multiple analog delay elements, which are modulated by several low frequency oscillators. Although the sound realism was missing, "string machines" have become legendary and are an integral part of the history of popular music. Now, KApro brings the sound of one of the most famous "string machines" to your KORG KRONOS: The KApro EXs124 „Famous String Ensemble“ Library.

“May the KApro EXs124 ‘Famous String Ensemble’ Library be with you!”

An absolute MUST HAVE for every KRONOS user!
