Thank you for purchasing the VibsyM library. We hope you enjoy playing the instrument and wish it supports your musical ideas or even better, inspire new ones.

The VibysM is a 3 1/2 octaves Musser concert vibraphone. This is one of the best vibraphone models ever made. It was played with soft mallets during the recording session to capture the maximum of dynamics and the softness of this instrument.

The vibraphone was very popular in the Jazz music particularly in the 50's and 60's. Today it is used more and more in popular music as well as modern jazz and even electronic music.

---

# VibsyM

The sample-set includes eight velocity sustain layers and three velocity release layers. Each note was recorded for full duration, providing an accurate sound with no artificial decay envelopes or sample loops. It was recorded with in ORTF configuration for a full stereo image.

It requires 524MB if fully loaded into sample memory but only 38MB when using virtual memory. Seven Programs are provided.

## Programs

---

VibsyM  
VibsyM 2  
VibsyM 3  
VibsyM Jazz  
VibsyM Jazz 2  
VibsyM Jazz 3  
VibsyM Pro

## Programming

SW#1	Typically turns on/off a tremolo effect.
SW#2	Typically turns on/off added release time.
Knob #7	Controls speed of the tremolo effect.
Knob #8	Controls depth of the reverb effect.
