KApro proudly introduce their KORG KRONOS
KApro EXs38 "Talking Synths & Computers" Library V3

KApro stellt mit der **KApro EXs38 „Talking Synths & Computers“ Library V3** neuartige Klänge vor, die besonders für den Einsatz in modernen „Dance Floor“ und „Electro“-Produktionen geeignet sind. Stilrichtungen wie beispielsweise Dub Step, Hip Hop, Acid, Techno sowie House, einschließlich Tribal, Afro, Latin und Urban, waren die Paten beim Sound Design. Das Ergebnis ist eine vollkommen neue Klangbibliothek, die selbst aufwendigen virtuellen Instrumenten Paroli bieten kann. Eine Vielzahl von „Robot-Voices“ und Computerstimmen, wie man sie von teuren und aufwändigen Vocodern kennt, eine riesige Menge neuartige „Dance Floor“-Drums und zahlreiche komplexe Effektklänge gesellen sich zu frischen Pads, pulsierenden Bässen und omnipräsenten Leads.

Die **KApro EXs38 „Talking Synths & Computers“ Library V3** bietet Ihnen ein Sound-Set aus

- 128 Programs in der Bank U-G,
- 7 Drum Kits in der Bank U-G,
- 73 monophonen Multisamples, die 682 monophone Einzelsamples verwenden, sowie 51 stereophonen Multisamples, die 793 stereophone Einzelsamples verwenden (1,09 GB PCM-Daten; 131 MB „Virtual RAM“),

für den KORG KRONOS.

Erhaschen Sie den KApro-Spirit mit der

KApro EXs38 „Talking Synths & Computers“ Library V3,
ein absolutes MUST HAVE für jeden KRONOS User!

KApro proudly introduce their KORG KRONOS
KApro EXs38 "Talking Synths & Computers" Library V3

The **KApro EXs38 "Talking Synths & Computers"** Library V3 introduces novel sounds which are particularly suitable for the use in modern "Dance Floor" and "Electro" productions. Musical styles such as Dub Step, Hip Hop, Acid, Techno and House, including Tribal, African, Latin and Urban, were the "facilitators" during the sound design. The result is a completely new sound library that can even challenge elaborate virtual instruments. In the EXs38 "Talking Synths & Computers" library, you find a large variety of "robot voices" and computer voices, well known from expensive and elaborate vocoders, a huge amount of new "Dance Floor" drums and many complex effect sounds, all of which join fresh-sounding pads, pulsating basses and omnipresent leads.

The **KApro EXs38 "Talking Synths & Computers"** Library V3 offers a sound set of

- 128 programs in the bank U-G,
- 7 drum kits in the bank U-G,
- 73 monophonic multisamples, using 682 monophonic samples, and 51 stereophonic multisamples, using 793 stereophonic samples (1.09 GB of PCM data; 131 MB of virtual RAM required),

for the KORG KRONOS.

Catch the KApro spirit with the

KApro EXs38 "Talking Synths & Computers" Library V3,
an absolute MUST HAVE for every KRONOS user!

HOW TO INSTALL THE EXs EXPANSION EXs38 ON THE KORG KRONOS [SOURCE: KORG]

INTRODUCTORY NOTICE

This command installs the selected EXs data onto the internal SSD, along with any associated files (.KSC, .PCG, .SNG etc).

Note that EXs can only be installed onto the internal SSD, and not to USB storage media.

In what follows, the installation of the **KApro EXs38 "Talking Synths & Computers"** Library V3 is described in detail.

Please follow the installation instructions given below (steps 1 until 11) step by step and word by word in order to enable a successful installation.

INSTALLING THE EXs EXPANSIONS EXs38, EXs132 AND EXs133 ON THE KORG KRONOS

- 1.** After you downloaded the EXs data

<http://www.gearzonemusic.com/Kronos/KApro/EXs38.zip>

or

http://www.gearzonemusic.com/Kronos/KApro/K2_EXs38.zip

copy the zipped file to the

top level ("root") of a USB storage device,

e.g. a USB stick, which you use for the data transfer between your computer and the KORG KRONOS.

2. Un-zip the zipped files directly on the top level of your USB storage device (cf. step 1).

Un-zipping the zip archive will result in a folder containing three several different files:

- *one file having the extension “.exsins”,*
- *a second file having the extension “.tar.gz” and*
- *a third file without any extension whose filename begins with the upper case letter “S”.*

In the case of the EXs38.zip, the directory structure on your USB storage device, with <DriveName> referring to the top level of your USB storage device, should then look like shown below:

```
<DriveName>|  
    EXs38.zip  
    EXs38\  
        EXs38.exsins  
        EXs38.tar.gz  
        S038
```

In the case of the K2_EXs38.zip, the directory structure on your USB storage device, with <DriveName> referring to the top level of your USB storage device, should then look like shown below:

```
<DriveName>|  
    K2_EXs38.zip  
    K2_EXs38\  
        EXs38.exsins  
        EXs38.tar.gz  
        S038
```

Note: Depending on your browser settings, the downloaded files may be unzipped automatically.

*As mentioned above, one of the files in each resulting folder has a name which ends with “tar.gz.” **Please do not un-zip this tar.gz file.***

- 3. Safely disconnect your USB storage device (cf. steps 1 and 2) from your computer.**
- 4. Connect your USB storage device (cf. steps 1 to 3) to the KORG KRONOS.**
- 5. Go to the Disk Utility page on the KORG KRONOS.**

- 6. Using the Drive Select menu at the bottom of the page, select your USB storage device (cf. steps 1 to 4).**

You may need to wait a few seconds after connecting the device before it is recognized.

*In the case of the EXs38.zip, the directory listing will look like
EXs38.zip
EXs38\
“EXs38\” being a folder.*

*In the case of the K2_EXs38.zip, the directory listing will look like
K2_EXs38.zip
K2_EXs38\
“K2_EXs38\” being a folder.*

- 7. Open the folder named “EXs38” (or “K2_EXs38”) on the top level of your USB storage device (cf. steps 1 to 4 and 6), containing the EXs data from step 2.**

When opening the folder “EXs38”(or “K2_EXs38”) you should find the following files:

*EXs38.exsins
EXs38.tar.gz
S038*

- 8. Select the file “EXs38.exsins” whose name ends in .exsins from within the “EXs38” (or “K2_EXs38”) folder.**

The “exsins” suffix stands for “EXS INStaller”.

*When a “.exsins” file is selected, the **Load** button changes to read **Install**.*

*Only one EXs can be installed at a time. If Multiple Select is On, **Install** will be disabled. Please switch of Multiple Select, then.*

- 9. Select Install EXs from the menu, or press the Install button.**

The system will check to confirm that the installation files are valid, and that there is sufficient space on the SSD to install the EXs. Next, a dialog box will appear:

***Found installer for: [EXs name] Space required: [nnn] MB SSD1: [disk name]
[nnn] GB available***

- 10. Press Install to continue with the installation,**

or

press Cancel to stop without installing.

An “are you sure?” message will appear to confirm the installation.

11. Press OK to continue with the installation,

or

press Cancel to stop without installing.

The installation will then begin. This may take a while; a progress bar shows the installation as it proceeds.

Next, the newly installed files will be verified.

After the verification has completed successfully, the progress bar will disappear, and the installation is complete. The EXs sample data itself is installed on an invisible, protected part of the disk.

To use the EXs, you'll load its associated files (.KSC, .PCG etc.); for the location of these files, see the documentation of the specific EXs.

That's it.

Now, you can begin to use the **KApro EXs38 "Talking Synths & Computers"** Library V3.

To do so, please load the **EXs38.PCG** file and then the **EXs38.KSC** file.

Now, your KRONOS is ready to be played.

USING THE NEWLY INSTALLED EXs38

[SOURCE: KORG]

LOADING THE NEWLY INSTALLED .PCG AND .KSC FILES

To use the **KApro EXs38 "Talking Synths & Computers"** Library V3 please load the file named

EXs38.PCG

first.

Then, please load the file named

EXs38.KSC

which will load the required links to the PCM data to provide hard disk streaming while you play.

Make sure to back up any sounds before overwriting them in memory.

You may need to free up sample RAM, or use the “Clear” option when loading the .KSC.

You can also

- *load specific sounds from the .KSC,*
- *make your own sub-sets of its sounds, and*
- *automatically load the new samples at startup.*

For more information, see

- *Global “0–3: KSC Auto-Load” on page 762.*
- *Global “0–4: Sample Management” on page 765.*
- *Disk mode menu command “Load .PCG” on page 829.*
- *Disk mode menu command “Load .KSC” on page 838.*

AUTHORIZATION

If an authorization code is required, the EXs will work in demo mode, fading in and out, **until the authorization code is purchased and entered into the KORG KRONOS.**

For more information, see “Global P6: Options Info” on page 803.

ERROR MESSAGES

When installing, error messages may be displayed to indicate problems, as described below.

“Error: invalid option file” means that the installation data is corrupted. **Copy the zip archive file to the USB media again and start with the installation again**, or if that fails, **download the data again. It might also mean that you do not install from within a folder, e.g. “EXs38\”. Please always install from within the relevant folder.**

“Error: not enough disk space for the installation” means that the internal SSD is too full. Remove data from the SSD, backing it up to USB media, in order to free up space.

UNINSTALLING EXs

Optional EXs may be uninstalled to reclaim space on the internal disk(s).

For more information, see “Uninstall EXs” on page 814.
