EXs62 KARO Pro Solosynth für KORG KRONOS ©

Im Jahre 1972 brachte ein heute nicht mehr existierender Hersteller von Synthesizern ein leichtes, tragbares, leicht zu handhabendes Live-Instrument auf den Markt.

Dieses Instrument konnte auf ein Elektronik-Piano oder eine Konsolen-Orgel gelegt werden. Es besaß keine Patch-Panels oder Kabel, aber eine Reihe von Kipp-Schaltern, die es dem Musiker erlaubten schnell einen von 30 monophonen Preset-Patches auszuwählen. Diese Patches waren nicht änderbar.

Obwohl nicht editierbar, besaßen die Sounds jedoch Voice Expression und fügten der Klangfarbe "Growl", "Wow", "Brilliance", Portamento, Pitch Bend, und/oder Vibrato hinzu. KARO stellt nun ein Abbild dieses klassischen Synthesizers mit seiner KARO Pro Solosynth Library vor. Unsere Library ist ein Muß für alle Liebhaber von Musikinstrumenten der 70iger Jahre.

An dieser Stelle möchte KARO seinen Dank gegenüber unserem Freund Donovan Aston ausdrücken, der uns sein Instrument zu Sample-Zwecken überlassen hat.

EXs62 KARO Pro Solosynth for KORG KRONOS ©

In 1972, a today no longer existing famous synthesizer producer released a light, portable, easy-to-use performance instrument that could be placed on top of an electric piano or console organ.

This instrument had no patch panels or cables but a set of toggle switches allowed the performer to quickly choose one of 30 preset monophonic patches that were not modifiable.

Although not editable, the sounds provided, however, voice expression, adding "growl", "wow", "brilliance", portamento, pitch bend, and/or vibrato to the timbre. KARO now provides a sketch of this classic synth with their KARO Pro Solosynth library. It is truly a must for all lovers of the 1970s musical gear.

At this point KARO would like to credit the support of our friend Donovan Aston who gave us his machine for the sampling session.
