System Version 3.0.4

December 5, 2015

Changes Since KRONOS System Version 3.0.3

General

Improvements

EXs Expansion Sample Series numbers greater than EXs124 are now supported. Note that when installing EXs libraries numbered 125 or higher, System Version 3.0.4 or later is required.

Using the “Level Meters Off” setting now provides a greater improvement to polyphony. (This parameter, found on the Global mode - Basic Setup page, disables the level meters for Oscillators, Timbres, Tracks, effects, etc.)

Bug fixes

When using commands such as “Remap MS/Sample Banks,” the progress-bar window might have become fuzzy. This has now been fixed.

Program mode (HD-1)

Bug fixes

When playing a Mono Legato program with Portamento On/Off, note-ons might have generated no sound or incorrect pitches. This has now been fixed.

Program mode (AL-1)

Improvements

The numeric keypad may now be used to edit the OSC1/2 “Initial Phase” parameter.

Sequencer mode

Improvements

In the “Put Pattern to MIDI Track,” “Copy Pattern to MIDI Track,” and “Load Template Song” dialogs, the selected Pattern can now be played by using the front-panel SEQUENCER [START/STOP] button.

Bug fixes

In rare cases, editing pattern assignments for keys on the “RPPR Setup” page might have caused an operational error. This has now been fixed.

In addition to those listed above, various other minor improvements and bug fixes are also included in this update.
