KRS54 KARO Virtual Analog für KORG KRONOS ©

"KARO Virtual Analog" ist ein neues Set von 128 Patches für den KORG KRONOS. Wir haben hauptsächlich drei KRONOS EXiS verwendet, nämlich AL1, MS20 und Polysix.

Unser Hauptaugenmerk bei der Programmierung dieser Sounds haben wir auf die Notwendigkeit gelegt, daß sie wie echte Vintage Synthesizer Patches klingen sollten.

Unsere Absicht war es nicht zu viel Rechenaufwand zu betreiben, d.h. jeder Klang wurde nur mit sovielen Effekten angereichert wie unbedingt nötig.

KRS54 KARO Virtual Analog for KORG KRONOS ©

"KARO Virtual Analog" constitutes a new set of 128 patches earmarked for Korg's Workstation KRONOS. We mainly used three KRONOS EXiS, namely AL1, MS20 and Polysix.

Our central effort while programming these sounds was to let them sound like pure vintage synthesizer patches.

Our intention was not using too much processing power, i.e. each sound has only been enriched with that many effects which are absolutely necessary.
