KRS55 KARO Wavestation für KORG KRONOS ©

Anfang der 90iger Jahre stellte KORG einen Synthesizer auf der Basis der Vektor Synthese vor, die Wavestation genannt wurde. Die Klangerzeugung der Wavestation basiert auf "Wave-Sequencing", einem Verfahren, bei dem mehrere PCM Samples hintereinander abgespielt werden und dabei neue Klänge entstehen.

Wie kein anderer Synthesizer zuvor, war die Wavestation in der Lage komplexe, reiche Klangfarben und rhythmische Sequenzen zu erzeugen, die wie ein vollständiger Soundtrack klangen und dabei wurde nur eine einzige Taste gedrückt.

Im Jahre 1995 listete die Fachzeitschrift Keyboard die Wavestation als eines der 20 Instrumente, die "Shook the World", d.h. die die Welt erzittern ließen.

KARO präsentiert eine neue Library - die KARO Wavestation Library.

KRS55 KARO Wavestation for KORG KRONOS ©

In the early 1990s, KORG presented a vector synthesis synthesizer, called the Wavestation. The Wavestation's sound generation has been based on wave sequencing, a method in which several PCM samples are played successively resulting in continuously evolving sounds.

Unlike any other synthesizer prior to its release, the Wavestation was capable of generating complex, lush timbres and rhythmic sequences that sounded like a complete soundtrack by pressing only one key.

In 1995, the Keyboard magazine listed it as one of the "20 Instruments that Shook the World."

KARO are presenting a new library, the KARO Wavestation library.
