

Thank you for your purchase of KRS 84 - EXi Super Synths

Please read the following before loading your new sounds
EXi Super Synths requires that you have Kronos OS Version 3.1 or later
installed

You can download at: — ***<https://www.korg.com/us/support/download/product/0/424/>***

PCG Programs are set to load in USER-GG - Combi data is set up to
load into your USER-G Bank

If you would like to load the sounds into another bank, follow the
instructions at this link:

<http://www.kidnepro.com/blog/korg-kronos-tutorial-how-to-move-sound-banks/>

How To Load Data

1- Insert your USB drive into one of the USB slots in the
back of Kronos.

2- Choose "Disk" and select your USB drive.

3- Find the Kid Nepro Kronos KRS 84 folder on your USB drive and open it. Or copy it to your Kronos Internal Hard Drive. To copy to your hard drive, choose the folder and go to "Utility/Copy". Change the Drive Select to "Internal HD", then choose "Paste". After you have copied the folder to your internal drive, find the Kid Nepro Kronos KRS 84 folder and choose "Open".

4- Choose the KRS84.PCG file and choose "Load". Set PCG contents to "All".

5- Choose "OK". Data will load in a few seconds. Do not touch anything while loading.

NOTE: To access the programs in the USER-GG bank, press the INT-G and USER-G buttons at the same time. Programs & Combis require that factory EXs Drum samples be loaded and all factory sounds be loaded. If the samples are not found, you will receive the "samples not loaded" message when accessing program or combi data.

If you have any questions please contact us:
